Manganese JV Update

The Manganese JV includes the Horseshoe South Manganese Mine (see Figure 1), which is the largest historical manganese mine in the region, as well as several other manganese prospects (see Figure 2).

In May 2020 Bryah completed a reverse circulation drilling program².

The next phase of exploration will drill targets at the new prospects at Black Beauty and Cheval as well as following-up successful results in the Brumby Creek and Horseshoe South Mine area.

In addition, diamond drilling to collect samples for metallurgical testwork is being planned.
