EUROZ

Executive Summary

Resources Quarterly - May 2019

Euroz Ltd (ASX:EZL) is an ASX listed financial services company offering stockbroking, corporate finance, funds management and private wealth management services.

Euroz Securities is the 100% owned stockbroking and corporate finance subsidiary. It is Western Australian based primarily focussed on providing advice to Australian and international institutional investors on predominantly WA oriented companies.

Euroz Securities model is founded on quality ASX equities research. It has invested in a team of six research analysts covering some 80 ASX listed companies in the natural resources and industrial sectors within the micro-cap, small-cap and mid-cap spectrum. Euroz Securities supports its research with comprehensive institutional and private client dealing, equity capital markets and corporate advice.

Our research philosophy is fundamental “bottom-up” value oriented analysis to provide clear investment recommendations.

Our coverage list comprises companies that own quality assets capable of generating a future income supporting a valuation in the context of risk and value opportunity.

Euroz selects companies whose directors share a partnership approach to equity investment and whose management is well regarded.

Our selection of companies aims to provide a wide range of opportunities from within our area of expertise. Consequently we are “stock-pickers” rather than offering complete sectoral coverage.

The Euroz Securities Resources Quarterly - May 2019 edition, is produced as a marketing document. The investment recommendations are consistent with, and valuations are not materially different from (+/-10%) the most recently published research notes. Please refer to the previously published research for greater detail.

Our Resources Company coverage list, with recommendations and price targets is summarised below. Share prices are as at C.O.B Monday 27th May 2019.

Please Note:

Since the March 2019 edition we have initiated coverage on the following companies: Mincor Resources NL, Otto Energy Ltd & Silver Lake Resources Ltd.

Since the March 2019 edition we have suspended coverage on the following companies: Venturix Resources Ltd

Our best buys are highlighted in blue below:

Comments

- CY18 EBITDA of \$340m demonstrates the impressive new run-rate for OMH with Sarawak smelter now fully operational;
- We expect op CF to remain stable at -\$180m/year for the foreseeable future which will allow rapid pay down of the Sarawak project facility (\$468m);
- Sarawak remains lowest cost quartile smelter underpinned by long term hydro power supply contract, delivering a US\$100m/year moat on earnings vs peers;
- OMH's world class Mn ore production assets continue to perform strongly, contributing NPAT of \$95m in CY18;
- The resumption of dividends highlights OMH's remarkable performance and Management's confidence in future CFs, with a total 5pcs div. for CY18;

Investment Case

OMH has delivered an impressive EBITDA of \$340m for CY18, a run-rate which we see as sustainable LT. Through low-cost hydro power contracts at its flagship Sarawak smelting project, OMH has built an estimated US\$100m/year moat vs peers. Coupled with world-class manganese ore mining and trading assets, OMH's strong FCF generation will continue to aid rapid deleveraging which is sure to be rewarded by the market in time. Our PT remains \$1.80/sh with a keen eye on repayment of debt.

Our Market Sensitivity

Valuation - \$1.75/sh
Price Target - \$1.80/sh

Bull Scenario - \$2.00/sh

Manganese ore price remains buoyant at current highs and the ZAR drops 10% from forecast. Ferrosilicon and manganese alloy prices also remain at current prices for the foreseeable future.

Base Scenario - \$1.80/sh

OMH continues to achieve production per guidance and underlying commodity prices remain robust. Chinese pro-green policies shut down high emission smelters, Sarawak's margins are maintained and the Group use strong CF to pay down debt.

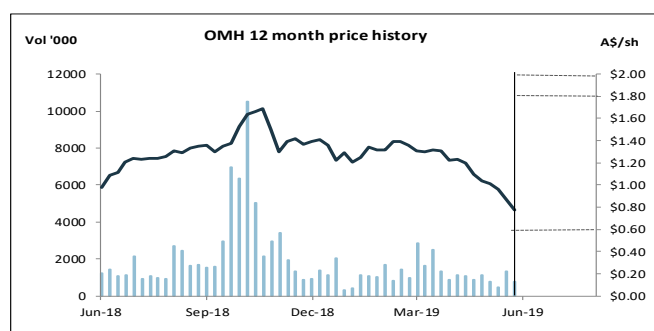

Bear Scenario - \$0.60/sh

Lower underlying commodity prices lead to thinner margins and less overall trading revenue. Third parties reduce trading volumes through OMH. Pipeline projects do not eventuate and there is no growth in the Group.

Company Summary

OMH is a vertically integrated manganese player engaged in the mining, smelting, trading and marketing of manganese ore, manganese alloys and ferrosilicon. With long-term, low cost electricity secured at its flagship Sarawak smelter, OMH is a lowest cost quartile smelter operator, allowing it to generate healthy margins throughout the market cycle. Smelter expansions, a growing product mix and beneficiation of existing stockpiles will continue to improve earnings and further strengthen its financial position.

Financial Terms

CAPEX	Capital Expenditure
Con note	Convertible Note
CPS	Cents Per Share
D and A	Depreciation and Amortisation
EBIT	Earnings before interest and tax
EBITDA	Earnings before interest, tax, depreciation and amortisation
EV	Enterprise Value = market capitalisation plus net debt
ETF's	Exchange Traded Funds
FX	Foreign Exchange
Hedging	Taking a buy or sell position in a futures market opposite to a position held in the cash market to minimise the risk of financial loss from an adverse price change.
IPO	Initial Public Offer
LME	London Metals Exchange
NPAT	Net Profit After Tax
NPV	Net Present Value
PER	Price Earnings Ratio
RMB	Rand Merchant Bank
RSPT	Resource Super Profits Tax
Scrip bid	A takeover offer where shares are offered partly or wholly in place of cash
Spot price	The market price for immediate delivery of a commodity, such as gold, silver or platinum
TSX	Toronto Stock Exchange
VWAP	Volume Weighted Average Price

Technical Terms

Assays	Results of chemical analysis of composition of mineral samples
BEE	Black Economic Empowerment
BF	Blast Furnace
BFS/DFS	Bankable Feasibility Study / Definitive Feasibility Study
CBM	Coal Bed Methane
CIL	Carbon in Leach
CIP	Carbon in Pulp
CNOOC	China National Offshore Oil Corp
Dip	Declination from horizontal of an inclined geological feature
DSO	Direct Shipping Ore
DR	Direct Reduction
Farm-down	Process of an asset holder relinquishing a portion of its equity interest
FEED	Front-End Engineering Design
FOB	Free on Board
Footwall	The lower wall of an inclined geological feature
FPSO	Floating Production Storage and Offloading unit
Grade	The amount of valuable mineral in the ore
GWC	Gas Water Contact
Hanging wall	The upper wall of an inclined geological feature
In situ deposit	Resources/Reserves still in the ground
JV	Joint Venture
LoI	Letter of Intent
MoU	Memorandum of Understanding
NOMR	New Order Mining Right
OWC	Oil Water Contact
PCP	Previous Corresponding Period
PFS	Pre Feasibility Study
PGM	Platinum Group Metals
Plunge	Direction of the long axis of a 3D geological feature
Premia	Contractually negotiated premium in addition to the agreed benchmark price
QoQ	Quarter on Quarter
QP	Quotational Period, the period between delivery and final pricing of partially finished commodity products
Res'c	Resource
Res'v	Reserve
ROM pad	Run of Mine pad, as delivered from the mine
SPP	Share Purchase Plan
Stoping	The process of mining the ore body on the plane of the reef
Strike	Horizontal projection of an inclined geological feature
Throughput	Quantity of material passed through the mill or a section thereof in a given time or at a given rate
Yield	The proportion of recovered valuable mineral as a percentage of total contained valuable mineral
YoY	Year on Year

Glossary

Reserves & Resources

Minerals

(Source: <http://www.jorc.org>)

JORC Code	Sets minimum standards for public reporting (in Australia & New Zealand) of exploration results, mineral resources and ore reserves
Mineral Reserves	Is the economically mineable part of a Measured or Indicated Mineral Resource
<i>Probable Mineral Reserves</i>	As per Mineral Reserves, however, is the economically mineable part of the 'Indicated' Mineral Resources, having the lower level of confidence of the Reserves
<i>Proved Mineral Reserves</i>	As per Mineral Reserves, however, is the economically mineable part of the 'Measured' Mineral Resources, having the higher level of confidence of the Reserves
Mineral Resources	Is a concentration or occurrence of material of intrinsic economic interest in or on the Earth's crust in such form and quantity that there are reasonable prospects for eventual economic extraction
<i>Inferred Mineral Resource</i>	That part of a Mineral Resource for which tonnage, grade and mineral content can be estimated based on geological evidence and assumed, but not verified, geological and/or grade continuity
<i>Measured Mineral Resource</i>	Estimated in the same manner as an Indicated Resource, except that (1) it can be estimated with a high level of confidence; (2) the information must be detailed and reliable; and (3) the locations are spaced closely enough to confirm geological and/or grade continuity
<i>Indicated Mineral Resource</i>	That part of a Mineral Resource for which tonnage, densities, shape, physical characteristics, grade and mineral content can be estimated with a reasonable level of confidence

Hydrocarbons

(Source: www.spe.org)

Reserves	Are those quantities of petroleum anticipated to be commercially recoverable by application of development projects to known accumulations from a given date forward under defined conditions
<i>1P reserves</i>	Taken to be equivalent to Proved Reserves; denotes low estimate scenario of Reserves
<i>2P reserves</i>	Taken to be equivalent to the sum of Proved plus Probable Reserves; denotes best estimate scenario of Reserves
<i>3P reserves</i>	Taken to be equivalent to the sum of Proved plus Probable plus possible; denotes high estimate scenario of Reserves
Contingent Resources	Are those quantities of petroleum estimated, as of a given date, to be potentially recoverable from known accumulations, but the applied project(s) are not yet considered mature enough for commercial development due to one or more contingencies
<i>1C resources</i>	Denotes low estimate scenario of Contingent Resources.
<i>2C resources</i>	2C Denotes best estimate scenario of Contingent Resources
<i>3C resources</i>	3C Denotes high estimate scenario of Contingent Resources
Probabilistic Pre-Drill Reserve Estimate	
<i>P10</i>	Low degree of certainty i.e. 10% chance or upside case estimate
<i>P50</i>	Mid case
<i>P90</i>	High degree of certainty i.e. 90% chance or base case estimate

Units

bbl	Barrel of oil. One barrel is equal to 159 litres
bcf	Billion cubic feet
boe	Barrel of oil equivalent
bopd	Barrels of oil per day
dmt	Dry metric tonnes
dmtu	Dry metric tonne units
GJ	Gigajoule
g/t	Grams per tonne, measurement unit of grade (1 g/t = 1 part per million)
kbopd	Thousand barrels of oil per day
koz	Thousand ounces
kozpa	Thousand ounce per annum
kt	Thousand tonnes
lb	Pounds
mcf	Thousand cubic feet
mmbbls	Million barrels of oil
mmboe	Million barrels of oil equivalent
mmcf	Million cubic feet
mmcfpd	Million cubic feet per day
